

INNOVATIVE TECHNOLOGY

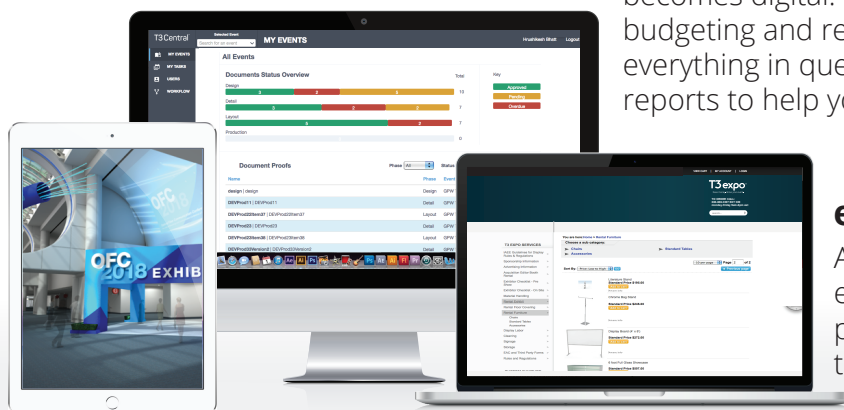

Is a patented magnetic panel system that allows installers to snap printed panels onto a 20-foot trade show booth wall in just ten seconds. Like Lincoln Logs or Legos, Presta™ panels snap together quickly and easily for a one-of-a-kind, custom display, and disassembly is just as easy. Presta™ allows us to create more versatile visuals with rich wraps and seamless brand messages, reducing complexity for Eventengineers™ to completely rebrand tradeshow in less than a day with the aid of this technology. Saving you time and money.

T3 CENTRAL

Is your digital command center where your entire events workflow becomes digital. Dashboards, reviews, approvals, planning, budgeting and reporting is centralized. It also keeps a full history of everything in queue and work completed and generates detailed reports to help you manage your internal and external constituents.

PINPOINT™

Gives you the ability to show your exhibitors what their advertisements will look like at your event, enabling you to create the visualization necessary to sell more sponsorship opportunities.

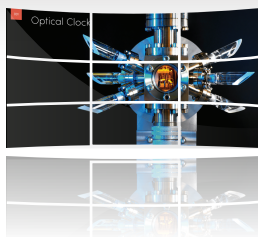

eCOMMERCE PLATFORM

An outline marketplace for your exhibitors to purchase, review, pay and track their shipments to your show.

T3 TRACKER

Traceability Reporting of Assets in Queue which picks up where a mail carrier leaves off at the tradeshow convention center, providing the "last mile" for your deliveries.

DIGITAL SIGNAGE

The ability to create dynamic, localized and resalable advertising opportunities at your event.

T3 COMMUNITIES

An Eventengineer powered and industry open wiki that centralizes knowledge about venues across the world.
